A special thanks to all our partners and other supporters

ENMC Full and Associated Partners:

Thanks to the continuous support of our partners and sponsors we are able to facilitate and organise on average 10 workshops per year. A successful format to connect researchers, clinicians and patients and thereby facilitating collaborations in neuromuscular research.

ENMC Company Forum Partners:

And many workshop-specific supporters: www.enmc.org

researchers and clinicians

The ENMC brings researchers, clinicians and health care professionals from all over the world together to develop treatments for rare neuromuscular diseases.

What is the ENMC?

The mission of the ENMC is to connect healthcare professionals worldwide in order to advance progress in the diagnosis, treatment and care of people with a neuromuscular condition.

How do we achieve this?

Teams of researchers and clinicians may submit an application for a workshop focused on one specific neuromuscular disease (NMD) or one specific aspect important for a wider range of NMDs, such as pain management or ventilation problems. Applications are reviewed by our Research Committee twice a year and the best applications are selected for a workshop. The ENMC takes care of the organisation, logistics and costs of the workshop. Workshops are held in The Netherlands, in the vicinity of Amsterdam Schiphol airport.

Are you interested in organizing an ENMC workshop?

Step 1-4

ENMC workshop application

Check www.enmc.org for submission deadlines, guidelines and application forms. Information on the participation of patients in the workshop and on the application for the ENMC Early-Career Programme are also available.

Step 5

Application of Early-Career scientists

The Early-Career Programme allows for the participation of 2-3 Early-Career scientists to introduce them to the community and enlarge their network. Applicants can be, but are not necessarily, affiliated to the institution of one of the participants.

Step 6

Review procedure

The ENMC Research Committee ensures a careful review of applications. The outcome is communicated within 3 months' time after submission.

Step 7

The ENMC workshop

A maximum of 20-25 workshop participants representing a wide range of countries and competencies is allowed. ENMC workshops focus on discussion of ongoing work (confidentiality agreement).

Step 8

Workshop outcomes

Each workshop application must have clear and feasible deliverables. A lay report of the workshop will be written for the general public and published in several languages on the ENMC website within two weeks' time after the workshop. A full paper will be published in the scientific journal *Neuromuscular Disorders*.

Call for themed workshops

Since 2021, the ENMC calls once a year for applications on a pre-defined topic.

The topic of a themed workshop call:

- is of broader interest to more than one condition (transversal workshops)
- requires a multidisciplinary approach
- is not often discussed in a workshop
- is groundbreaking and strategic and requires the development of a sustainable platform in the future.

IT TAKES ONLY 8 STEPS TO AN EFFICIENT WORKSHOP:
